

BIAS SIDE TABLE

CRASSEVIG

DESIGNER: GECKELER MICHELS

CRASSEVIG

From the encounter between an inclined cylinder and a slender circle comes the Bias wooden coffee table, a perfect union of dynamism, stability and refined craftsmanship. The base, with a diameter of 30 or 50 cm, is made of curved oak plywood, with no visible joints for an impeccable aesthetic result and with an open-pore finish. The small empty space created between the top and the base, as well as suggesting a dynamic feel, acts as a grip to help move the coffee table, designed to sit alongside armchairs or sofas.
