

MIXIS TABLE

CRASSEVIG

DESIGNER: MARIO FERRARINI

CRASSEVIG

The Mixis table's various shapes and dimensions echo the form and construction concept of the Mixis chair, thus creating a perfect match for this model, as well as for various other chairs in the Crassevig collection. The structure is made of solid wood, while the top can be oak veneered plywood, stained or lacquered ash, and laminate with a special silk finish, a version very popular for both domestic and contract use.
