

# Stack Chair

Designed by  
Martini & Dall'agnol  
for Midj

The Stack chair features two unique compass-shaped legs that ensure stable vertical stacking. Designed by Milanese designers Enrico Martini and Dimitri Dall'Agnol for Midj, it is crafted using 100% recyclable materials and consists of just two components that fit together without the need for screws.

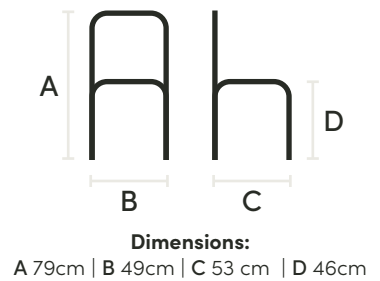

Available in various finishes and colours, the Stack Chair's elegant lines, rounded corners, and soft padding provide exceptional comfort, making it an ideal choice for public and private spaces.

The Stack Chair was presented with the Archiproducts Design Award 2023 and the German Design Award 2024. It has been selected for the prestigious ADI Design Index 2024 by the ADI Permanent Design Observatory, allowing it to be a part of the 2026 Compasso d'Oro, Italy's premier industrial design awards.

# Specifications & Styles

The Stack Chair is made of polypropylene, making it suitable for outdoor use, and can be customised with a finish in leather, hide, wood, fabric, or a padded cushion. Choose from a range of colours that can be configured in two different tones for the base and shell, creating colourful and characterful combinations.
